

VKBD 1015

Technical Bulletin - October 2013

RENAULT Clio Grandtour, Clio III, Megane II, Modus/Grand Modus, Twingo

Fitting Instructions: mandatory replacement of the nut included in the kit!

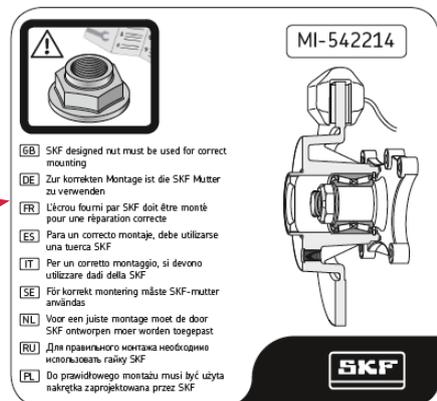

Renault OE number: 77 01 207 823

To ensure a complete and professional repair of the wheel bearing and brake disc kit VKBD 1015, the nut provided in the kit must be changed during the mounting.

The correct nut tightening torque must be applied (175 Nm) in order to get the required clamping force needed by the bearing unit.

VKBD 1015

The mounting instructions inside the kit ensure you to operate the right fitting instructions!

It emphasizes the importance of throwing the old dismantled nut away and use the nut included in the box.

Note: if the dismantled/old nut is re-used, performances issues or early failure can occur!

Old nut design

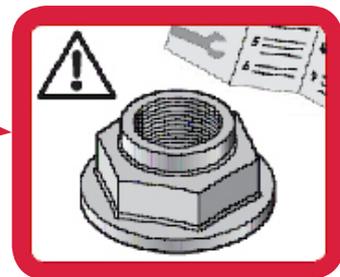

New nut design

Tightening torque: 175 Nm
