530 0082 09 (SET)*

In contrast to the competition, Schaeffler Automotive Aftermarket offers only **one** timing belt, instead of two, for the vehicles and engine codes listed above.

This timing belt (1) can be used without restriction, provided that the tensioning pulley (2) has a metal running surface.

This condition complies with the pulley contained in the listed KITS and SETs.

A fundamental difference between the KITS/SETs listed in the left column under (A) and (B) is the pulley mounted on the vibration damper 532 0161 10 (5).

This pulley is not installed in engines "up to engine number" (this number differs depending on manufacturer). They are used in engines "from the engine number onwards".

You can find the exact listing in our catalogue.
