Installation of C 16 134/1

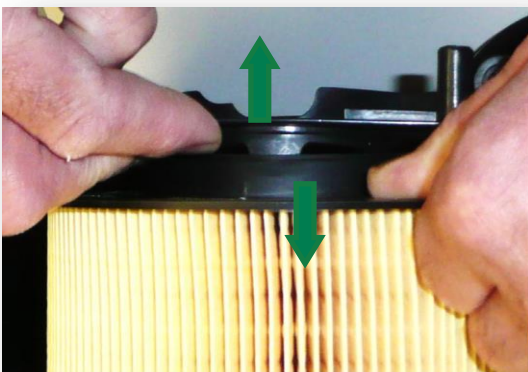

Changing the MANN-FILTER C 16 134/1 is quite easy, so long as a couple of points are observed on installation:

1 When inserting the filter element ensure that the alignment contour is correctly placed into the notch provided.

2 Ensure that the edge of the element base completely fits into the groove of the housing.

3 Pull the wall up and the element to the opposite direction. Push the flexible seal over the lip of the housing.

4 The element seal has to be situated behind the housing lip.
